

Cybersecurity

When you partner with CFGI, you gain access to our team of highly trained cybersecurity practitioners who possess the skills and mindset required to meet today's challenges and ensure a strong, mature cybersecurity posture.

Successfully defending your business depends on the security of your people, process, and technology. Achieving this critical goal requires the ability to think like an attacker. At CFGI, our cybersecurity and data privacy advisors help companies understand the risks to your systems and data while identifying exposures within your IT environment.

- **\$8.64 million** — Average total cost of a data breach in the U.S.
- **33% of data breaches** are caused by insider threats.
- **60% of data breaches** have been linked to Third-Parties.
- **\$10.5 trillion** — Annual cost of cybercrime by 2025.
- **3.5 million cybersecurity positions** remain unfilled in 2023.
